SHARED VALUES AND TEAM WORK IN CROATIA

Tihana Dakić-Baričević has been working in the tourism industry for 27 years, and she can bear witness to the fact that a lot has changed, including the awareness of local people and tourists. The DestiMED PLUS project is part of this change, and has had an impact on the way tourism is developing on the Islands of Cres and Lošinj.

"More and more tourists seek a sustainable approach. Before, tourists who visited our island mostly looked forward to the sea, sunbathing and relaxing, and rarely wanted alternative activities, nature walks and so on. But this is changing – out of season now we are visited by tourists who want to stay in nature and stay longer. We have branded Lošinj the 'Island of Vitality', and expanded our offer; so tourists who visit us are aware that we enjoy living here all year round, and that we do not depend only on tourist visits in July and August. On the island we build with natural materials, respecting nature

(Cres Lošinj is a Natura2000 site), we inform our guests about saving water, sustainable energy, garbage sorting, and the seasonal offer of food and organic products".

The project has also highlighted the fact that governance, conservation and an attractive ecotourism product can go hand in hand, and has demonstrated the importance of team work.

"Sharing the workload I learned a lot, I felt that I was not alone – the project is successful because I have a team! DestiMED PLUS confirmed that without the synergy of the community, progress is not possible. It validates my long-standing opinion that there is no competition in this business, only a common goal: a happy client who recounts the benefits of our island to the world. We want to make a guest a friend of Lošinj, learn from guest what we can improve or constantly developing our approach."

We spoke to Tihana Dakić-Baričević from the tourism agency Ad (Veli Lošinj, Croatia), working with the Institute of Tourism Croatia, a DestiMED PLUS project partner.

"The island inspires tranquility and peace. We walk through the small alleys to the Scented Garden, filled with lavender, to discover indigenous plants and herbs... every corner is filled with quaint artefacts put together artistically by our host, Luka"

This week, the island of Lošinj is in the center of European attention due to the activity that combines tourism & sustainable development [#DESTIMEDPLUS & #FAMTrip](#)

2 media & travel bloggers were discovering the beauties of Lošinj island, testing accommodation, typical food & ecotourism activities.

DESTIMED PLUS brings together 9 mediterranean regions to develop and promote ecotourism in their protected areas.

INFO: <https://destimed-plus.interreg-med.eu/>

Otok Lošinj ovoga je tjedna ponovo u središtu europske pozornosti [#DESTIMEDPLUS & #FAMTrip](#)

Na Lošinju trenutno borave odabrani internacionalni blogeri, influenseri i predstavnici turoperatora zapadnoeuropskog tržišta koje okuplja INTERREG DestiMED PLUS projekt, a čiji je zadatak iskusiti, promovirati i potencijalno tržišno plasirati novokreirani all-inclusive, inovativni, zeleni, održivi, ekoturistički paket aranžman „YOUR OWN RHYTHM OF SENSES“.

Happy World Water Day! 🌊

◆ Did you know!?

The Two Dolphins fountain was erected in 1960 to mark the opening of the water system in Mali Lošinj. The rainwater from the tanks has been replaced by the top-quality water of the Lake Vrana on the island of Cres, which still runs in every shower and tap on Lošinj. Have a good drink of this water, for its quality is better than any of those bottled waters!

Sretan Svjetski dan voda! 🌊

◆ Jeste li znali!?

Fontana Dva dupina postavljena je na 'pjaci' 1960. godine u čast izgradnje vodovoda u Malom Lošinju. Kišnicu iz cisterni zamjenila je izvrsna voda iz Vranskog jezera na otoku Cresu koja i danas jednako teče iz svake lošinske špine i tuša. Napijte se do sita jer bolja je od mnogih voda u boci!

Preuzmite letak za goste, a radi se o preporukama za prevenciju požara 

https://bit.ly/visitlosinj_letak

Na službenim stranicama Državnog hidrometeorološkog zavoda Indeks opasnosti od šumskog požara na području Lošinja označen je crveno, što predstavlja visoku mogućnost. Dnevne promjene možete pratiti na linku: https://bit.ly/DHMZ_Iosinj

#visitlosinj

SPRIJEČITE POŽAR! PREVENT FIRE!

HR

- Ne bacajte opuške u prirodu
- Održavajte svoje okućnice čistima, uklonite suho raslinje, građevinski otpad i slično
- Ne roštiljajte za vrijeme vjetrovita vremena i osigurajte pokraj roštilja sredstvo za gašenje požara. Obavezno ugasite žar.
- Ne bacajte vrući pepeo sa žeravicom i opuške u posude koje se mogu zapaliti. Uvjerite se da su opušci ugašeni.
- Ne palite vatru na otvorenom
- Isključite elektronske aparate kada ih ne koristite (ne ostavljate punjače uključene u struju kada ih ne koristite)
- U objektu ne držite zapaljive i eksplozivne tvari u nedozvoljenim količinama
- Oslobođite prostor oko aparata kako bi protočnost zraka bila što bolja.

GB

- Do not throw cigarette butts on the ground.
- Keep your yard clean, remove dry vegetation, construction waste and the like.
- Do not grill on a windy day and keep a fire extinguisher near the grill. Be sure embers are extinguished properly.
- Do not throw hot ashes with embers and cigarette butts into flammable containers. Make sure cigarette butts are fully extinguished.
- Do not light a fire outside.
- Turn off electronic devices when not in use (do not leave chargers plugged in to sockets when not in use).
- Do not keep flammable and explosive substances in illegal quantities in the facility.
- Free up the space around the device to make sure the air-flow is as good as possible.

Ukoliko primjetite požar nazovite vatrogasce!

If you notice a fire, please call the fire services!

👉 Zamišljena stepenasta piramida od najfinijeg pjesaka usred mora – to je otok Susak. Nekada je bio čitav prekriven vinogradima ograđenima trstikom jer na otoku nema kamena. Grožđem i vinom se kupovalo sve ostalo – od kamena za gradnju kuća do vune za živopisnu nošnju.

Jeste li ga već posjetili? Imate li koju (ne-)ljetnu 📸 sa Susak? 😊

👉 Imagine a steep pyramid of the finest sand in the middle of the sea. That is the island of Susak. It was once covered with vineyards enclosed by reed (because there are no stones on the island), and the grapes and wine provided means to buy everything that was necessary – from stones to build houses to wool for their colourful folk costumes.

Have you already visited Susak? Do you have (non-summer) 📸 from Susak? 😊

[POGODI ŠTO?] 🤔

Znaš li o kojem je kostimu riječ? 🤔

Kamizot na faldice također je ružičaste boje a preko njega dolazi pregača, tarvierslica, od ružičaste svile sa širokim obrubima ukrašenim na jednak način kao i poprsje/rukavi zabjake. Ispod se nose tri podsuknje, jako uškrobljene (inkolane) te pojačane sa širokim volanom u donjem dijelu. Sukna rakamana i tu je prisutna, također je užeg kraja te ukrašena još bogatije nego po susacku. Kao najdonji sloj ruha javljaju se opet mudande s čipkicom. Na nogama ružičaste kalcete i kožnate postoli.

[GUESS WHAT?] 🤔

Do you know which costume this is? 🤔

'Kamizot na faldice' is also pink, with apron (tarvierslica) made of pink silk with wide borders decorated in the same way as the bust/sleeves of zabjaka worn over it. Underneath, three underskirts, very starched (inkolane) and reinforced with a wide frill in the lower part, are worn. Sukna rakamana appears here as well, and it is also of narrower cut and more richly decorated than in the po susacku style. Mudande with lace are present again as the underneath layer of clothing. Feet are covered by pink calcete and leather shoes (postoli).

NEREZINE - MUAJ/NEREZINSKI MUAJ

This is a folk-scene performance that has been held for over 200 years, on the first Sunday in May, it symbolizes the greeting to spring. 🌸
